I had a building inspection completed by Aus. Building Inspections in February 2020. I had to reschedule at the last minute and the team were very understanding and easy to communicate with. The inspector showed up on time and was very respectful. He completed a very detailed report and was available for a follow up phone conversation which was extremely helpful. I would definitely recommend this service.

This inspection was worth every dollar! We'd found a place we really loved and were prepared to bid hard for it at the auction. It was last minute, but on the Thursday, I called Aus Building Inspections, and they were able to do the inspection the following day with a written report submitted to me on the same day! Nathan was great. He called me as soon as he'd done the inspection and told me the house had major structural issues and a major termite and borer infestation! His call alone was enough to make us pull out, but the documentation report was great. Extremely thorough, full of photos and explanations of every single major structural issue to the termite management program installed on site. The inspector was very knowledgeable. His report saved us from buying a total lemon! I highly recommend these guys and we'll be using them again when we find another place we like.

I have now obtained multiple building & pest inspection reports from Aus Building Inspections in the past few weeks. The customer service has been outstanding, and the building inspector was very honest & comprehensive. The report was delivered within 6 hours. The reports were thorough and certainly assisted us in deciding whether or not to proceed with the purchase of the property. I highly recommend prospective buyers to engage Aus Building Inspections especially Shubham for a building and pest inspection prior to their next purchase.

Aus Building Inspections completed a building & pest inspection for us on a prospective purchase. They were recommended to us and were priced well so we engaged them. I was very impressed with the turnaround time and detail of the report. I even called the rep for a couple of questions of which they were more than happy to help elaborate on the report items. Would vouch for their inspection services to family and friends.

Shubham is knowledgeable and a true professional. He attended our property after recent flooding and provided an objective report as to the repairs that needed to take place. His report gave us confidence to engage tradespeople to quote the repairs that needed to take place. He delivered the report in a timely manner

We went through Aus Building Inspections based on previous reviews, and they haven't disappointed. Great quality reporting and awesome customer service! They were able to work around a tentative date for my pre-slab stage and corresponded with my builder on my behalf. Great work team!

I've dealt with Shubham many times & he has always provided an excellent service. We've used him for five properties until now and I wouldn't use anyone else till I am successful at an auction. The report is extremely detailed & too easy to follow. The follow up phone call to explain everything is cherry on top. Great service. Highly recommended.

Excellent customer service and prompt responses from Nathan. We engaged AUS BI company for a practical completion/ handover inspection and couldn't be happier with the report as a number of critical defects were picked up that would've been missed.

Shubham from Aus Building Inspection Melbourne was our Consultant. He was super efficient and professional. He took adequate measures to follow the Health & Safety Regulations as well as respected our space. Spot on with time management, skilled report work, clear quotations and provided tailor-made solutions to meet our requirements.
